harmonis

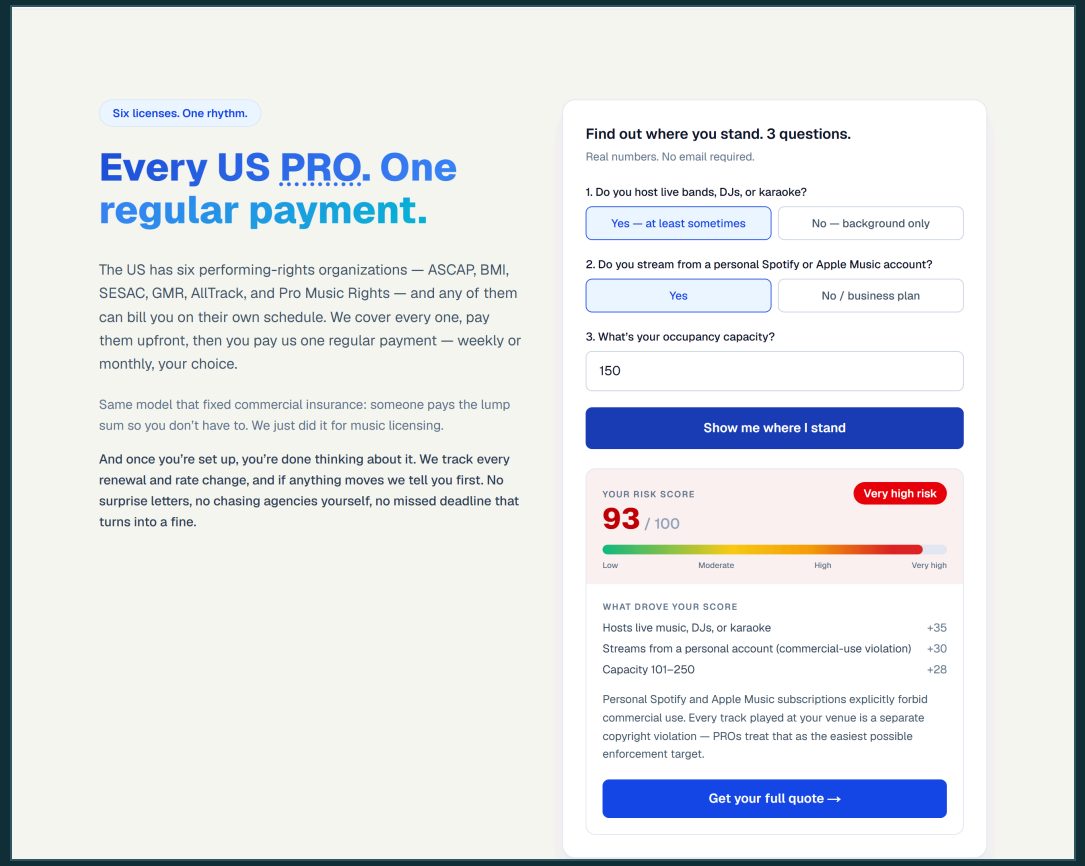

PRE-SEED INVESTOR OVERVIEW · OCTOBER 2026

# Six licenses. One rhythm.

Music-licensing coordination for hospitality. Quotes and the customer portal are available; automated weekly payments are the planned next step.

**Portal available at harmonis.io**

Savren Dobbs, CEO · Rick Dobbs, Co-Founder & VP Sales & Marketing

harmonis.io today: the three-question risk check every venue starts with.

THE PROBLEM

# Music drives the check. Paying for it is stuck in the past.

Music drives vibe. Vibe drives dwell time. Dwell time drives check size. Yet hospitality groups still pay for music the old way: fragmented, reactive and risky.

**WHAT A VENUE OWES THE SIX PROS EACH YEAR[3]**

| | | |
|---|---|---|
| **$1.5–2K** | **$3–3.8K** | **$8–13K+** |
| Small bar / cafe | Mid-size, DJ nights | Live music, 250+ cap |

### Six PRO relationships

ASCAP, BMI, SESAC, GMR, AllTrack and PMR each send their own invoices, rate tiers and renewal dates, for every location.

### Unpredictable lump sums

Annual invoices land at arbitrary times. A surprise $15,000 licensing bill in Q4 wrecks a group's cash-flow forecast.[1]

### Constant audit exposure

PRO reps walk in on a Friday night. Willful infringement can carry statutory damages up to **$150,000 per work**.[2]

**Harmonis aims to coordinate six PROs, predictable payments and venue evidence.**

1 Example from the Harmonis Executive Summary. 2 17 U.S.C. §504(c)(2): up to $150,000 per work for willful infringement, at a court's discretion; actual awards vary.
3 Per location, from published 2026 rate schedules as shown on harmonis.io/pricing. GMR and PMR publish no bar schedule and are estimated.

WHAT HARMONIS IS

# One back-office portal for licensing coordination.

| TRADITIONAL LICENSING | THE HARMONIS APPROACH |
|---|---|
| 6 separate PRO relationships | **1 automated platform** |
| Unpredictable annual lump sums | **Planned weekly bank-linked payments** |
| 10+ hours a year of back-office admin | **Target: less routine administration** |
| Constant audit exposure | **Venue records and coverage status** |

**Less manager work.** One back-office portal; reduced training is a design goal.

**Payment plan.** Daily calculations and weekly collection are the planned flow.[1]

**Evidence records.** Payment history and PRO confirmation are separate; neither removes legal risk.

**Onboarding target: under 15 minutes.** Timing and support needs require pilot measurement.

Comparison and claims as stated in the Harmonis Executive Summary.

1 Production bank-linked payments require integration, provider approval and end-to-end validation (slide 16). $4.99/month + 10% pricing.

PLANNED PAYMENT FLOW

# Calculate daily. Collect weekly. Reconcile separately.

EVERY NIGHT

### Daily pacing ledger

Design: calculate daily venue allocations and record a timestamped split. Calculation itself moves no money.

BEFORE COLLECTION

### Advance notice

Design: show the planned debit and notify the owner before collection. Delivery timing needs validation.

WEEKLY

### One weekly debit

Design: combine weekly entries into one ACH debit. Provider activation and actual processing costs remain to be validated.[1]

ON FAILURE

### Exception workflow

Design: reconcile failed collections, hold affected payouts and route follow-up. ACH return handling needs end-to-end testing.

**$4.12** a day
calculated, never charged

**× 7 days = $28.84**
illustrative weekly total, not a live debit

**Separate evidence**
for what's owed, collected and paid to each PRO

Design per the Harmonis Payment Flow; dollar figures are its illustrative example. 1 Processing-cost target from the same document.
Portal and payment components exist; production ACH, notices and return handling require integration and validation (slide 16).

PRODUCT AVAILABLE; PAYMENTS PRE-LAUNCH

# The portal is available. Live payments come next.

**76**
product screens

**61**
API endpoints

**8**
scheduled job definitions

**32**
published local licensing pages

**235**
California venues found by the lead engine

**Six-PRO quote engine** pricing ASCAP, BMI, SESAC, GMR, AllTrack and PMR

**Customer portal** with coverage-status records and public QR verification

**Multi-location accounts** so a group adds venue #12 from the same login

**Online signing** with Power of Attorney, Letters of Agency and an audit trail

**Planned pay-as-you-sell** sizing from bank deposits[1]

**Lead engine** on California liquor-license data, scored and queued for outreach

**Partner and landlord program** with referral links and commission tracking

**PRO dispute intake** plus an automatic scan for under-reported music use

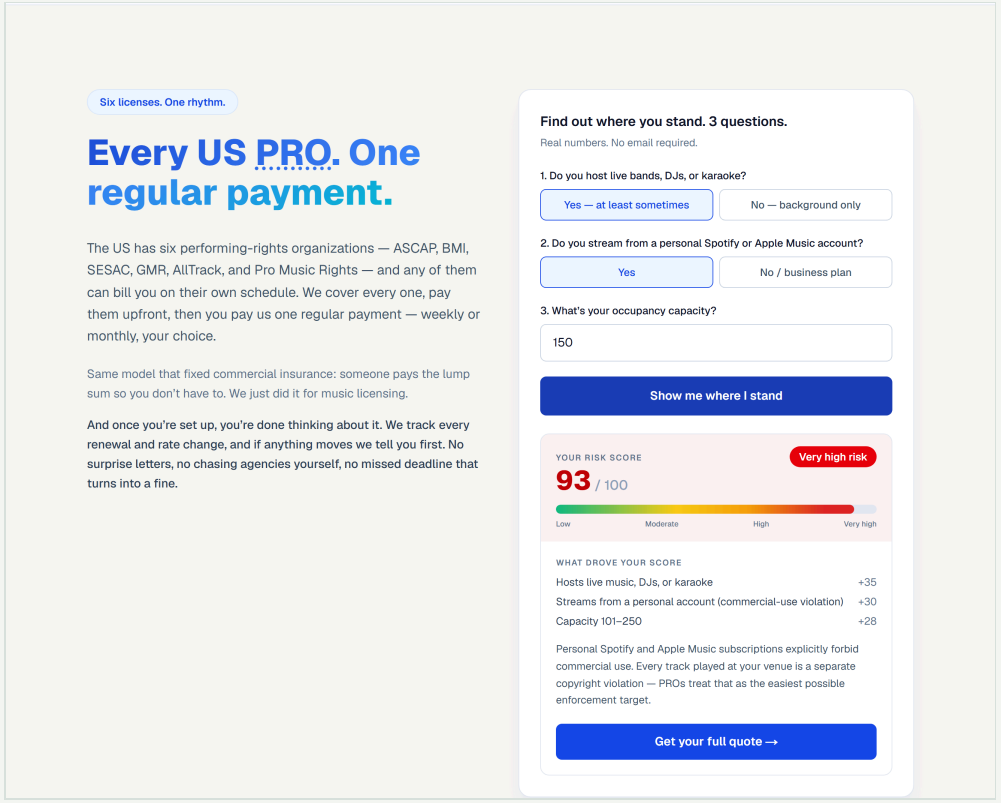

**Operator console**: renewals, dunning, PRO payments, rate cards, audit log

**Error alerting** configured to notify the team

Counts from the Harmonis codebase and the live sitemap and database, October 4, 2026. 235 = venues captured from California ABC license data, April 17 to October 3, 2026.
1 Bank-based sizing and production payments require provider activation and validation (slide 16).

WALKTHROUGH · 1 OF 4

# Three questions to a real number.

harmonis.io · homepage risk check

**The front door.** Live music? Personal Spotify? Capacity? The answers produce a risk score and the reasons behind it.

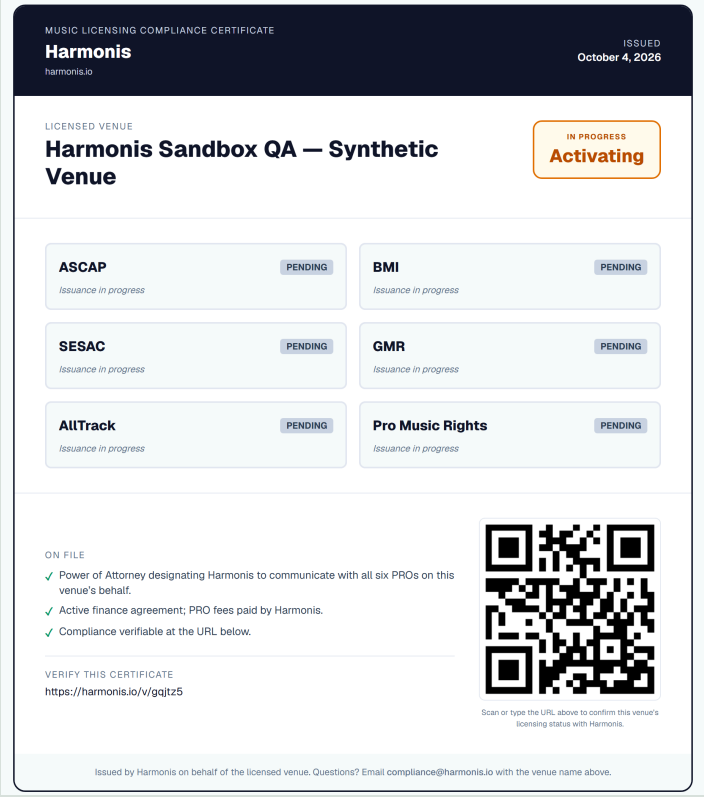

**Plain English.** No PRO jargon. The owner sees what drives the number and gets a full six-PRO quote from there.

**Built for panic moments.** Search pages for 'got a BMI letter' and 32 local markets route owners straight here.

Screen captured from harmonis.io on October 4, 2026 with sample answers (live/DJ nights, personal Spotify, 150 capacity).

WALKTHROUGH · 2 OF 4

# One place to inspect venue licensing records.

harmonis.io/dashboard · certificate

**Available portal features**

One record of six PRO statuses

Public verify link + QR

Renewals tracked automatically

PRO contact log

**Status, not a license guarantee.** The QR page shows app records; actual coverage needs PRO confirmation and coverage dates.

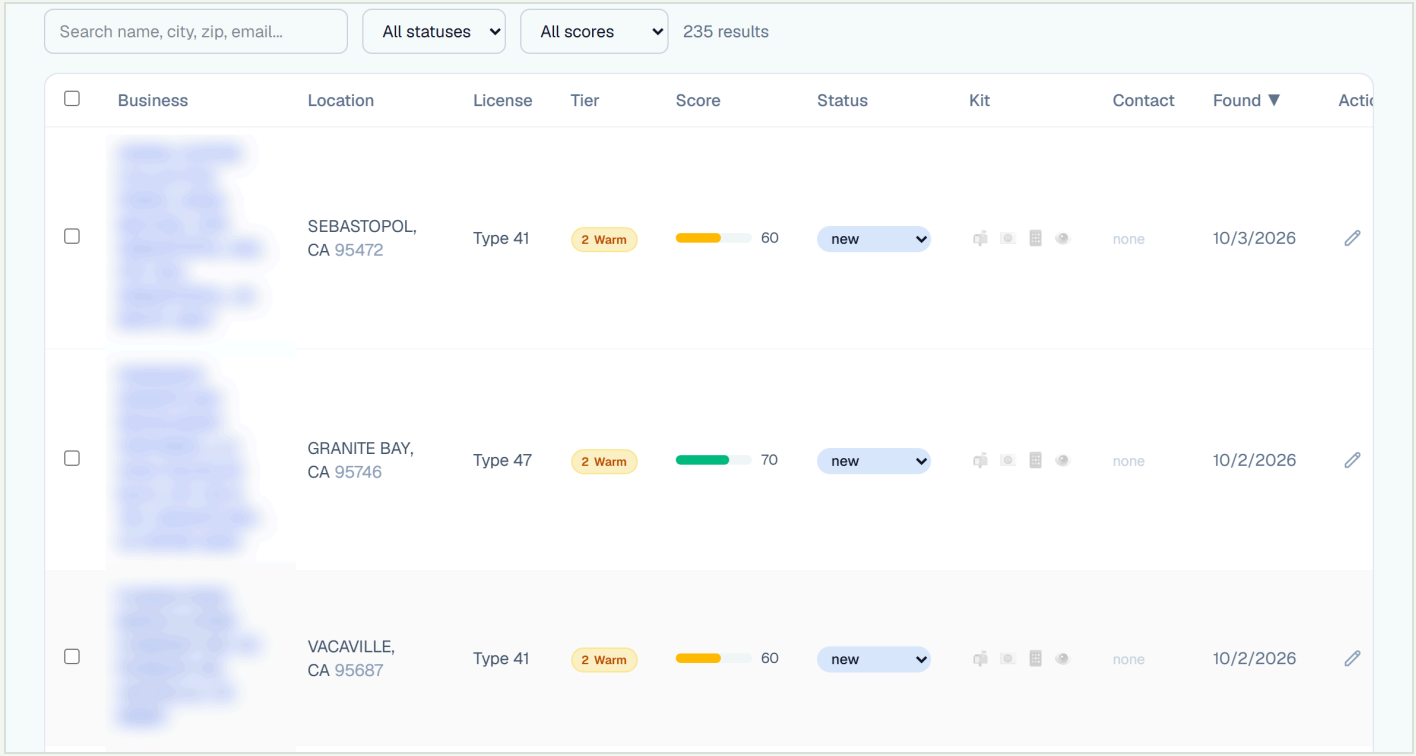

**Agency documents.** The portal records signed authority. Counsel review and PRO acceptance remain separate steps.

**Self-service.** Venues can update details. Material usage changes require review of pricing and coverage.

Internal test venue in the customer portal. Pending PRO statuses are not confirmed licenses; payment alone does not establish coverage.

WALKTHROUGH · 3 OF 4

# Daily lead collection from California license data.

harmonis.io/admin · lead pipeline (business names blurred)

**235**

newly licensed California venues captured automatically since April

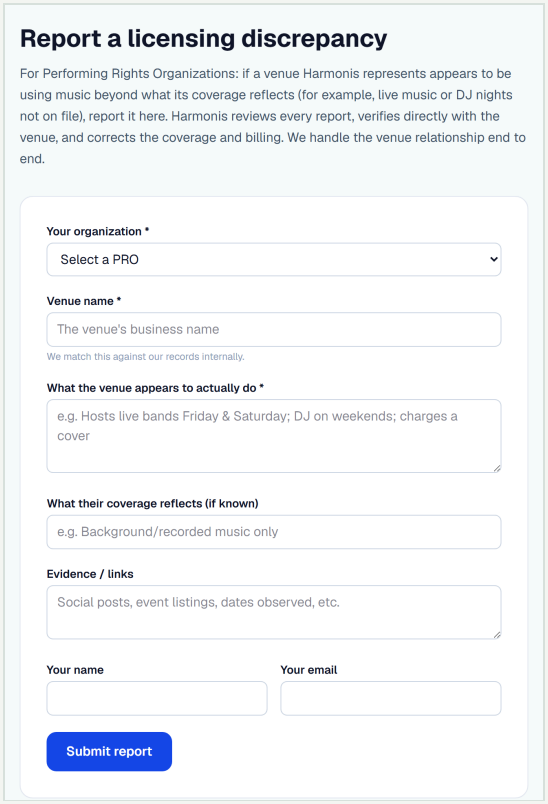

**A daily prospecting feed.** The engine collects available California ABC records, scores venues and queues them. Source publication may lag issuance.

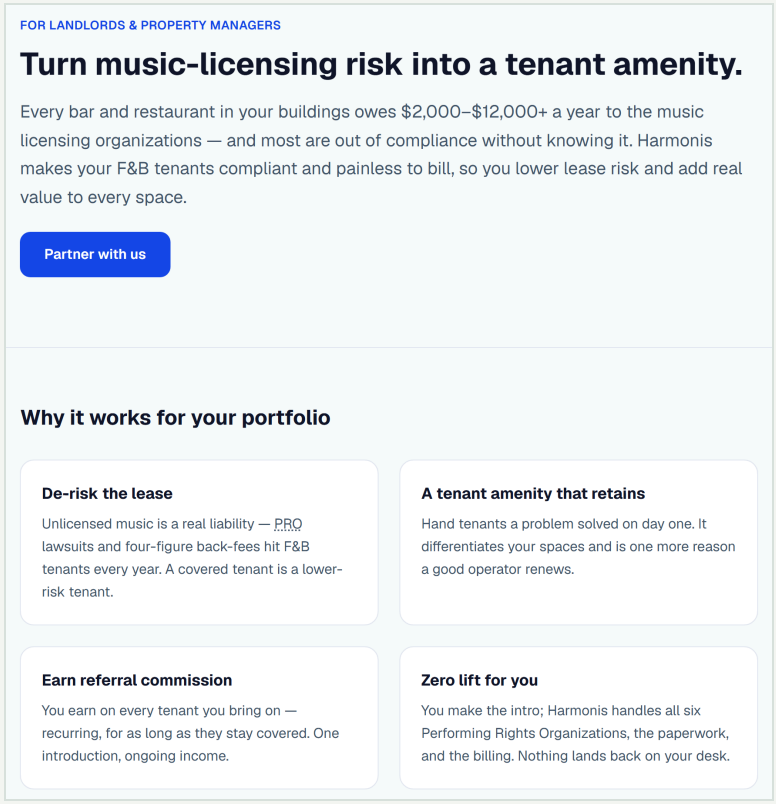

**Direct mail is ready.** Three postcards (cash flow, less paperwork, one payment) and a seven-step email sequence are staged.[1]

Source: California ABC license data captured by Harmonis between April 17 and October 3, 2026 (newest record found October 3).
1 Postcards in the Harmonis Marketing folder (V4). Mail and email outreach launch with the go-to-market budget (slide 16).

WALKTHROUGH · 4 OF 4

# Tools for disputes and partner referrals.

**PRO dispute desk.** If a PRO thinks a venue under-reports its music, it files here. Operators review evidence and decide the next action.

**Honest-usage controls.** Venues attest to their usage at signing, and an automatic scan flags venues whose profile suggests live music or DJs.

**Partner channel.** A partner portal supports referrals from landlords, accountants and insurance brokers, with commission reporting.

Captured from harmonis.io/disputes and harmonis.io/for-landlords on October 4, 2026. Dispute queue, attestation and usage scan are live in the operator console.

PRICING AND ILLUSTRATIVE ECONOMICS

# $4.99 a month plus 10% of the licensing bill.

## PRICING

**$4.99/month** per location

**+ 10%** of the venue's annual PRO bill

The licensing money passes through to the PROs.

**~$439**

modeled annual fee revenue[1]

**$200**

assumed acquisition cost[1]

**2.5%**

assumed monthly churn[1]

**$3,795**

modeled annual PRO bill[1]

## What real venues owe the licensing companies*

These are the annual amounts venues owe the six Performing Rights Organizations directly — from their actual 2026 rate schedules. Your exact number depends on your venue.

| | |
|---|---|
| **Small bar / cafe**<br>Under 100 cap, background music only | **$1,500–2,000**/yr owed* |
| **Mid-size restaurant**<br>100-250 cap, DJ nights + background music | **$3,000–3,800**/yr owed* |
| **Large venue / live music**<br>250+ cap, live bands, cover charge | **$8,000–13,000+**/yr owed* |

Illustrative website ranges, not venue-specific bills. GMR and PMR are estimated; exact fees and coverage need confirmation. Harmonis charges its service fee on top.

Model: $3,795 annual PRO bill (60/30/10 small/mid/large mix, four largest PROs) x 10% + $4.99 x 12 = $439.38 annual fee revenue.
$200 acquisition cost and 2.5% monthly churn are unmeasured assumptions. Processing, servicing and other costs are excluded; no realized LTV, payback or margin is claimed.

FINANCIAL UPSIDE

# What scale could mean for company revenue.

Music at 10% of U.S. restaurants and bars. TV rights at 5%.[1]

| SERVICE | SHARE OF ~800,000 VENUES[2] | PAYING VENUES | ANNUAL FEE REVENUE |
|---|---|---|---|
| **Music licensing**<br>$30 a month per venue | **10%** | **80,000** | **$28.8M** |
| **TV rights**<br>Adds $60 a month (from $30 to $90) | **5%** | **40,000** | **$28.8M** |

**$57.6M a year** combined: 80,000 music venues, 40,000 of them also on TV rights.

1 Management scenarios from Rick's November 9 update, not current revenue or a dated forecast. Annual fee revenue = paying venues × monthly average × 12. TV rights are a planned expansion.

2 ~800,000 is an assumed count of all U.S. restaurants and bars, not a verified venue count; slide 13 counts 297,540 bars and full-service restaurants. Revenue excludes licensing pass-through and is not profit or valuation.

§8.3 OPERATING ECONOMICS

# Low prices need low acquisition and servicing costs.

Keep venue pricing affordable. Use automation to reduce the work required per account.

## Automation carries routine work

SEO and partner referrals aim to lower customer acquisition cost.

Automated onboarding, payments and reminders aim to reduce servicing cost.

## People handle exceptions

Plan for live customer support, collections and PRO account management.

Measure workload before setting staffing ratios. Automate repeatable cases as they emerge.

Track acquisition cost, retention, support time, payment costs and contribution margin as volume grows.

Source: Harmonis Business Plan §8.3, Unit Economics Philosophy, and Rick's October 5 operating assumptions.
Low cost is the operating objective, not a measured zero-cost claim. Support, collections, account management, legal, marketing and infrastructure remain costs.

MUSIC-ONLY MARKET

# Roughly 300,000 U.S. bars and full-service restaurants.

**297,540**

U.S. bars and full-service restaurants[1]

**~$1.1B**

in annual PRO licensing those venues would route through Harmonis[2]

**~$131M**

music-only annual Harmonis fee pool at current pricing[2]

### Beachhead: Northern California

California has 34,653 bars and full-service restaurants, about $15M a year in fees at this pricing.[1] [2] Multi-unit groups first.

### Built for multi-unit groups

Target: add a location in under 15 minutes. Pilot timing, training and support workload remain to be measured.

### Built to scale nationally

Rate engine, local search pages and lead engine are state-agnostic. New states require local data feeds, pages and operating validation.

1 U.S. Census Bureau, County Business Patterns 2022: drinking places (NAICS 722410) 40,258 + full-service restaurants (722511) 257,282. California: 3,279 + 31,374 = 34,653.

2 Derived: establishment count × modeled $3,795 average PRO bill, or × ~$439 revenue per location. Upper bound; not every venue plays music or needs all six licenses.

GO-TO-MARKET

# Prepared campaigns, search and partner recruitment.

READY

### Direct mail to new licensees

Daily collection identifies published license records; mail and landing pages are prepared for the campaign.

SALES-LED

### Multi-unit operators

Planned sales conversations with hospitality groups: one portal across locations, with pilot onboarding support.

LIVE

### Panic searches

Pages for 'got a BMI letter', 'is ASCAP a scam' and 32 local markets meet owners when they're searching.

PORTAL LIVE

### Partners

Referral portal available for accountants, brokers, landlords and POS resellers. Partner recruitment is planned.

PREPARED CAMPAIGN CONCEPTS

**Planned weekly payments.**

Cash flow

**Run your venue. We'll handle the music licensing.**

Less paperwork

**Six music licenses. One payment.**

One payment

Campaign concepts adapted from the Harmonis Marketing folder (V4, 4×6). Page count from the live harmonis.io sitemap, October 4, 2026.

TEAM

# The people behind Harmonis.

## Savren Dobbs

**Chief Executive Officer**

Leads the company and investor reporting.

savren@harmonis.io

## Rick Dobbs

**Co-Founder & VP of Sales and Marketing**

Two-plus decades building and running bars and lounges, plus commercial audio and hospitality merchant systems.[1]

rick@harmonis.io

**Quotes and the portal are available. The raise funds customer acquisition, payment integration, legal review and a limited pilot.**

Titles and contacts per the Harmonis SAFE term sheet. 1 Background as described in the Harmonis business plan (August 2026).

WHAT THE RAISE FUNDS

# $250,000 funds launch work and a limited pilot.

## $100K

40%

### GTM & local direct mailer acceleration

Postcards to newly licensed venues, search pages and operator outreach across Northern California.

Tests conversion of 235 captured leads.[1]

## $65K

26%

### Plaid API refinement & POS engine

Integrate production bank-linked weekly payments, validate the flow and develop the planned POS engine.

Payments run in test mode today.[2]

## $45K

18%

### Legal, compliance & PRO defense fund

Counsel review of agency and Power of Attorney language, PRO account setup, and a defense reserve.

Agency documents await attorney review.[3]

## $40K

16%

### Working capital & reserves

Limited pilot reserve for upfront PRO bills while collections arrive. Capacity depends on actual bills and cash timing.

Limited pilot float; not scale financing.

Allocation per the Harmonis SAFE term sheet. 1 No paying venues yet. 2 Live payments await Plaid production access and final processor activation.
3 Agency, Power of Attorney and attestation language are drafted and in use but not yet attorney-reviewed.

THE ASK

# $250,000 pre-seed on a post-money SAFE.

**Spend 15 minutes seeing the portal and discussing the plan for licensing coordination and weekly payments.**

Open harmonis.io, run the risk check, and ask us anything about what's behind it.

**Savren Dobbs**, CEO · savren@harmonis.io

**Rick Dobbs**, Co-Founder & VP Sales & Marketing · rick@harmonis.io

SAFE TERMS[1]
